COMPANY PROFILE

INNOVO DEVELOPMENT BULGARIA Ltd. is a Bulgarian company founded in 2014 in Sofia as a subsidiary of INNOVO DEVELOPMENT AUSTRIA GMBH. Company specializes in Telecommunications, Consulting Services, Project Management, Commercial Intermediation and Transport Infrastructure. Over the years, the company has established itself on the market and is a preferred partner for our foreign partners. In the process of communicating with customers, the company offers an individual approach and comprehensive service due to individual and partnership cooperation. The partnership obliges you to maintain long-term relationships based on maximum reliability along with high quality and innovative approaches, and this is one of our main goals. The company would not have achieved its success without qualified and loyal employees. At the moment, the company cooperates with specialists who have the necessary qualifications and many years of experience to be able to offer our customers high quality and secure partnership.

The management of INNOVO DEVELOPMENT BULGARIA Ltd. together with its employees strives to make the company different from other organizations with related activities, offering a wide range of its own products, both unified and products with specific requirements to order. The quality management system is based on ISO 9001: 2008 and integrates all processes in the organization that are relevant to product quality. ISO 14001: 2015 certification helps to achieve the company's planned results and is an effective tool for identifying and systematically reducing possible harmful effects on the environment. The information security management system ISO 27001: 2017 is an approach that primarily aims to manage the confidentiality, integrity and availability of information in our company.
